PROFESSIONAL SUMMARY

Frontend Web Developer with 5+ years of experience building scalable web applications, data visualisation dashboards, and responsive UI components. Proficient in JavaScript, TypeScript, Vue.js, React.js, Angular, Node.js, HTML5, and CSS3. Experienced in collecting end-user requirements, ensuring technical feasibility of UI/UX designs, maintaining consistent platform experiences, and integrating RESTful APIs. Strong communicator in Agile, cross-functional engineering teams.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, Vue.js, React.js, Angular, Node.js, Next.js, Nuxt.js, Python (basic)

Web Architecture & APIs: RESTful APIs, Web Services, Microservices, distributed systems, object-oriented design

UI / UX & Performance: HTML5, CSS3, responsive design, cross-browser compatibility, WCAG 2.1, data visualisation

Testing & Tooling: Jest, Playwright, Cypress, Webpack, Figma, Storybook, Git, GitHub, CI/CD

PROFESSIONAL EXPERIENCE

Senior Front-End Developer | HCL Tech — Client: Google *June 2024 – Present*

- Designed and developed frontend web applications including data visualization dashboards, documentation portals, and engineering tracking tools used across the organization.
- Collected requirements and consulted with end users on workflows and use cases; ensured technical feasibility of UI/UX designs with a consistent look and feel across platforms.
- Improved UI responsiveness in Angular and TypeScript, boosting usability scores by 18%; maintained 90%+ test coverage using Playwright in Agile CI/CD workflows.
- Built and maintained RESTful API integrations, implementing clean data flows between frontend interfaces and backend infrastructure services.

Frontend Engineer | Tata Consultancy Services (TCS) *Jan 2020 – Sep 2022*

- Developed interactive Vue.js and React.js dashboards and data flow UIs for enterprise clients; consulted with end users to translate complex workflows into scalable frontend solutions.
- Resolved cross-browser compatibility issues and implemented design solutions for consistent UI behaviour across all major browsers.
- Integrated RESTful APIs and JWT authentication flows, improving login performance by 28%; contributed to reusable design systems using object-oriented design principles.

Software Engineering Intern | Cyient *May 2018 – June 2019*

- Built internal web application features using JavaScript, HTML5, and CSS3; gathered end-user requirements and delivered UI refinements improving responsiveness and usability.

EDUCATION

MS Computer Science — Oklahoma City University

Aug 2022 – Dec 2023

BTech Information Technology — Kakatiya Institute of Technology and Science

Aug 2015 – May 2019
